

About the Dairy Innovation Hub

The Dairy Innovation Hub harnesses research and development at UW-Madison, UW-Platteville, and UW-River Falls campuses to keep Wisconsin's dairy community at the global forefront in producing nutritious dairy products in an economically, environmentally, and socially sustainable manner.

Dairy Innovation Hub

Alumni Profile

Rachel Skinner
Graduate Research Assistant at Kansas State University

How has the Dairy Innovation Hub impacted you and/or your career?

"The Dairy Innovation Hub has supported many of the professors, such as Dr. Kehoe and Dr. Kelm, that made a big impact on my undergraduate studies. They're even impacting me all the way in Kansas! My major professor was supported by the Hub for his post-doc at Madison and I will be helping him on an additional research project that builds off that work."

Student Profile

Ashley Carns
UW-Platteville Undergraduate

How has the Dairy Innovation Hub impacted you and/or your learning opportunities?

"The Dairy Innovation Hub has supported me through learning opportunities at UW-Platteville with classes that are related to dairy production and research projects that students have the opportunity to be a part of."

The Dairy Innovation Hub

Key Priority Areas

Land and Water

Develop technologies and practices to reduce greenhouse gas emissions, improve air quality, or reduce odor.

Human Health and Nutrition

Design food processing, packaging and delivery technologies to improve product quality and shelf-life.

Animal Health and Welfare

Develop data analytics for animal management (nutrition, genetics, etc.) that translate to on-farm tools.

Farm Business and Community

Support entrepreneurship and establishing agricultural technology start-ups.
